The **Vasavi Information Centre** is a revolutionary platform that connects the Vasavi community across multiple locations. This phased approach ensures a structured and sustainable digital presence, fostering engagement, information sharing, and community growth.

---------------------------------------------------------------------------------------------------------------------

## Vasavi Information Centre - Project Features

### 1. Core Features & Services

### 1.1. Community Welfare & Support

- **Gosaala (Cow Shelter) Information**: Location details, maintenance updates, donation options, and volunteer opportunities.

- **Old Age Home Support**: Information on facilities, admission details, and donation programs.

- **Vasavi Temples & Religious Services**: List of Vasavi temples, pooja schedules, special events, and seva bookings.

- **Vasavi Hospitals & Medical Support**: Details on Vasavi hospitals, health camps, free medical services, and emergency contacts.

- **Anna Daana Sathrams Coordination**: Information on free meal services, locations, and sponsorship options.

### 1.2. 1250 Information Centers (Hierarchical Structure)

- **Organized by Geography**:
  - Country → State → District → Mandal

- **40+ Categories at Mandal Level**:
  - Temples, service centers, sathrams, NGOs, education centers, social service groups, and more.

- **Centralized & Localized Information**:
  - Each mandal to have specific data, ensuring accessibility to local community members.

### 1.3. Events & Programs

- **1250 Center Events**: Regular updates on cultural, social, and religious programs at all centers.

- **Vasavi Trust Events**: Information on programs conducted by various Vasavi trusts.

- **Job Motivation & Training Programs**: Employment guidance, skill development workshops, and entrepreneurship programs.

- **Government Services Assistance**: Helping community members with government schemes, subsidies, and legal procedures.

## 1.4. Community Engagement & Communication

- **Birthday, Marriage Day, & Achievement Greetings**: Automated message system for personalized greetings via email/SMS/WhatsApp.

- **Regular Newsletters & Notifications**: Updates on upcoming events, service activities, and community achievements.

- **User-Friendly Event Submission**: Allowing community members to submit events for approval and listing.

## 1.5. Business & Networking

- **Business Directory & Listings**: Real estate, auditing, trade services, and more for community businesses.

- **Networking & Business Expansion**: Facilitating business collaborations and growth within the community.

- **Job & Business Classifieds**: Connecting job seekers with employers and promoting business opportunities.

## 1.6. Admin & Member Access

- **Admin Login for Center-wise Data Management**: Designated administrators per center can update details.

- **Event & Category Management**: Each center can update its own information dynamically.

- **Access Control & User Management**: Role-based permissions for secure data handling.

## 2. Implementation Plan & Proposal

## 2.1. Initial Launch - April 12th

- **Static Website Release**:

  - A well-structured, informative, and visually appealing website.

- o Showcasing key aspects of Vasavi Information Center.

- o Providing essential contact details and initial information.

## 2.2. Future Enhancements (Dynamic Features to be Implemented Gradually)

- **Dynamic Data Updates**: Admins can update information center-wise.

- **User Registration & Login**: Personalized dashboards for members.

- **Automated Notifications & Greetings**: Scheduled messages to users.

- **Business & Job Listings Portal**: For networking and employment.

- **Event Submission & Approval System**: Community-driven event additions.

## 2.3. Addressing Client Expectations

- **Ensuring a Smooth Transition from Static to Dynamic**:

  - o The initial website launch is a foundation, ensuring a quick and professional online presence.

  - o The static website ensures no delays in launching the project.

  - o All dynamic features will be implemented in a phased manner for efficiency and quality.

  - o The project will evolve based on user feedback and community needs, making it more user-friendly over time.
